## Projects

---

**Iman-xpress** -[Live site url](#) | [Github client](#) | [Github server](#)

Mern stack application

- This site was created by four of us. And I was the team leader. So I am expert in how to work in a group and how to maintain a group and i will fit into any companies team quickly
- Iman xpress has multifeatures. It has ride-sharing services,food delivery,courier and ecommerce services.
- Riders and users can chat with each others by this chatting system
- Utilized **React, Material-ui, firebase authentication,React-hook-form, Express, Mongoddb,Mongoose,bycriptjs,express validation etc.**

**Travel&destination**-[Live site url](#) | [Github client](#) | [Github server](#)

Mern stack application

- This is a travel blog application using mern stack where users can share their experiences. And the user will be able to choose which blog he will see through ratings
- This site has an admin panel through which admins can add blogs. This blog has got 'Manage Options' which allows admin to delete, view and update the blog without any page Reloading.
- This site has login and register system with google login and username email and password
- Utilized **React, Material-ui, firebase authentication, React-hook-form, Express,**

**Mongodb**

**Automantia-** [Live site url](#) | [Github client](#) | [Github server](#)

Mern stack application

- Developed an selling based Application using mern stack that allows users to buy car. Here the user will be able to give reviews and the admin will be able to manage the product and order.
- Integrated stripe payments to accept credit/debit cards.
- Utilized **React, Material-ui, firebase authentication, Express , Mongodb.**

**Bazarsodai -** [Live site url](#) | [Github client](#)

React native application

- This is a list app. Its a native app.
- With this app you can create a list of anything And if that work is done, it can be crossed and deleted
- **If you have expo app in your mobile then go to live site url and scan that QR code**
- Utilized **React native, AsyncStorage**

**Newspaper App -** [Live site url](#) | [Github client](#)

React native application

- This is a newspaper app. Its a React native app.
- This is a newspaper app so you can see all type of news in this site.
- **If you have expo app in your mobile then go to live site url and scan that QR code**
- Utilized **React native, News Api, NativeBase ui library**
